PROFILE

I help small teams move faster by removing the handoff gaps between analytics, interface design and engineering, following the work from insight to interface to code.

JOURNEY

2020	Began designing: visual creation, UI/UX research and design, CMS design.
2021	Moved into web development: HTML, CSS, JavaScript, WordPress, PHP, plugin and theme development, REST APIs, SEO.
2022	Added full-stack development to close the design-to-code gap.
2023 - 2024	Delivered the highest number of web development projects.
2025	IT support and systems analyst role, bridging business needs and IT; grew into data analysis and project management.
2026	Leading teams through the full SDLC: analysis, planning, design, development, testing and delivery.
